To whomever it may concern,

I am looking for an opportunity to grow in my field of computer technology. I am eager to learn and master new technologies, ready to solve new problems efficiently and imaginatively.

My current employment has given me the knowledge and experience of building numerous websites, from single page applications all the way up to custom designed Wordpress CMS websites with complex features. From SEO enhancement, to object oriented applications for time and project management.

My portfolio is as follows:

- crouescleaners.com
- tangledbobbin.ca
- camptamarack.ca
- sherritoerper.ca
- c-itpowered.ca
- mopcraftcleaning.ca
- ridetssr.ca

I have also done database design and optimization, Wordpress plugin development, and web applications for time management.

I am also knowledgeable with SEO enhancement, and have worked with a number of API's and frameworks.

Working at my current job for the last three and a half years has also given me knowledge and experience of working with many different people, both management and clients.

I am a highly motivated individual and am able to work both independently, or as part of a team.

I feel that I have much to offer in terms of what I can contribute both as an employee, and as an individual.

I welcome the opportunity to discuss how I may fit within your team. Thank you for your time and consideration

Sincerely,

Colby Garland
